

Veterans Health CouncilSM

improving veterans health through information and advocacy

Why is the Veterans Health Council needed?

- Eighty percent of veterans do not use the VA for their health care.
- Most veterans are not aware that they may have military service-related health problems which entitle them to compensation and medical care from the Department of Veterans Affairs (VA).
- Most private clinicians are unaware of the connection between these health issues and military service.

The Veterans Health Council is a program
of Vietnam Veterans of America
